#### Government agencies and policy bodies

Governments in the main international business target countries (UK, Singapore) have policies in place that allow for Canadian students to apply for work visas. This will enable students to apply for positions without being concerned about their immigration status in the host countries.

Table 1: Undergraduate Enrolment Projections

- Provide details regarding the anticipated yearly in-take and projected steady-state enrolment target including timeline for achieving it.

Level of study	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19
1 <sup>st</sup> year	25	40	40	40	40	40	40
2 <sup>nd</sup> year		24	40	40	40	40	40
3 <sup>rd</sup> year			24	38	38	38	38
4 <sup>th</sup> year				24	38	38	38

Please note when the program expects to reach steady state: 2016-17

\*NOTE: We have built in a very small drop in enrolment each year to account for expected attrition.

#### 8. Admission Requirements

As with the existing BBA programs, MIB students must present the following required high school courses:

Calculus & Vectors: 75% minimum  
Advanced Functions: 75% minimum  
English: 75% minimum

Calculus and Functions are required in order for students to be successful in their quantitatively-based studies, and English is a standard requirement for all potential UTSC students. Since the MIB has a language requirement, MIB students will be strongly encouraged to present evidence of study in a language other than English (one of: French, Tamil, Spanish, Hindi, Mandarin, Arabic, Japanese).

A supplementary application form, similar to that which already exists for admission to the BBA Co-op programs, will be used in order to assess interest, writing skills (in English), and previous work, volunteer and extra-curricular experience that will help them to excel in the program. From here, we plan to develop a short-list of candidates whom we would interview in order to ensure that the students have an "international mindset". The interviews would assess the following:

- Demonstrative leadership skills that would allow them to thrive in a foreign work environment
- Maturity, self-direction, responsibility, and their understanding that they must not knowingly put themselves into situations wherein their safety and security could be compromised
- The level of the student's previous cross-cultural experience and whether they are independent enough to be successful while away from family and friends
- Potential to develop and implement the skill sets and qualities that will enable them to behave in an appropriate manner during their co-op work placements (i.e., self-confidence, positive and realistic commitment, practical problem-solving ability, flexibility and adaptability, sensitivity to the needs of others, openness to learning, desire to share skills, and ability to work with others)

Prepared by the Office of the Dean for UTSC Academic Committee. 28 June, 2011.
